PROJECTS

Airbnb Clone

GitHub

- Designed and implemented a **responsive** and user-friendly frontend using **React** and **Tailwind CSS**.
- Ensured secure registration, and log-in to the application by using technologies like **bcrypt**, **jsonwebtoken**.
- Implemented back-end API endpoints using **Express.js** to handle requests and provide data to the front-end application.
- Integrated with the **MongoDB** database using **Mongoose** to store and retrieve listing information, user data, and authentication details.
- Utilized **AWS S3** and **AWS SDK** to enable users to upload and manage photos for their listings.

Portfolio Website

GitHub

- Developed a professional portfolio website using **React.js** and **Vanilla CSS** to showcase personal projects, skills, and experience.
- Utilized **React components** and **state management** to create a dynamic and interactive user experience.
- Designed and implemented a fully **responsive** and visually appealing user interface.
- Integrated **EmailJS** to enable seamless communication and interaction with visitor

Html-Css-JavaScript-Projects

GitHub

- Maintained an active GitHub repository hosting a collection of **HTML**, **CSS**, and **JavaScript** projects
- Hosted all projects on GitHub Pages, providing live links in the repositorys README for easy access and demonstration.
- Developed and updated a diverse range of projects, including **responsive layouts**, and **interactive components**.

LINKS

- **LeetCode** Solved over 230 problems on LeetCode.
- **GeeksforGeeks** Solved 120+ problems on GeeksforGeeks.
- **Codeforces** Solved 120+ problems on Codeforces.
